

➔ Aqua Flair — RO Water Purification System

Aqua Flair RO systems are designed to deliver high-purity, great-tasting water for homes, businesses, and industries. Our systems combine advanced membrane technology, efficient filtration stages, and reliable components to ensure consistent water quality and long-term performance.

➔ Key Benefits

- ➔ High TDS removal & consistent water purity
- ➔ Durable components for long life
- ➔ Energy-efficient, low-maintenance design

➔ Industrial RO Systems

- ➔ Large-capacity RO plants for continuous process water treatment.
- ➔ **INCLUDES:** Multi-stage filtration, antiscalant dosing, industrial pumps, SS skid, PLC/auto control, long-life membranes.
- ➔ **CAPACITIES:** 500—20,000+ LPH.
- ➔ **USE:** Factories, boilers, cooling towers, pharma, food & beverage.

➔ Commercial RO Systems

- ➔ High-output RO units for moderate daily consumption.
- ➔ **INCLUDES:** Heavy-duty prefiltration, high-pressure pump, auto-flush, TDS/pressure control, SS/FRP housings.
- ➔ **CAPACITIES:** 150 LPH, 250 LPH, 500 LPH.
- ➔ **USE:** Cafés, offices, restaurants, schools, clinics.

➔ Residential RO Systems

- ➔ Compact RO units for household drinking water.
- ➔ **INCLUDES:** Multi-stage filtration, RO membrane, carbon filters, UV/UF options, mineral/alkaline cartridges, and booster pump.
- ➔ **USE:** Homes, apartments, kitchens.
